## FAX TRANSMISSION

DATE: March 10, 2005

PTO IDENTIFIER: Application Number 09/891,865

Patent Number

Inventor: Giuseppina Bestetti et al.

MESSAGE TO: Examiner David J. Steadman, Ph.D.  
US Patent and Trademark Office

FAX NUMBER: (703) 872-9306

FROM: DARBY &amp; DARBY P.C.

Heather Morehouse Ettinger, Ph.D.

PHONE: (212) 836-3744

Attorney Dkt. #: 02901/000J410-USO

PAGES (Including Cover Sheet): 4

## CONTENTS:

Certificate of Transmission (1 page)  
Proposed Claims (2 pages)

Attached please find claims for an After-Allowance Amendment under 37 C.F.R. § 1.312 for U.S.S.N. 09/891,865. Pursuant to a telephone call on March 9, 2005 from Examiner Steadman to Applicants' representative Heather Ettinger, the claims filed with the After-Allowance Amendment filed on Jan. 21, 2005 have been amended. Specifically, the claims have been renumbered and claim 76 has been amended to end with the phrase "wherein the proteins are produced," so as to make the end of the claim consistent with the preamble of the claim. Please contact me if you have any questions. The claims submitted herewith differ from those submitted on March 9, only by presenting the proper status identifier of each claim.

If your receipt of this transmission is in error, please notify this firm immediately by collect call to sender at (212) 836-3744 and send the original transmission to us by return mail at the address below.

This transmission is intended for the sole use of the individual and entity to whom it is addressed, and may contain information that is privileged, confidential and exempt from disclosure under applicable law. You are hereby notified that any dissemination, distribution or duplication of this transmission by someone other than the intended addressee or its designated agent is strictly prohibited.

**Claims for After-Allowance Amendment under 37 C.F.R. § 1.312 for U.S.S.N. 09/891,865**

1-42. (Cancelled)

43. (Previously Presented) A plasmid vector having the sequence of SEQ ID NO: 1, SEQ ID NO: 2, SEQ ID NO: 3, SEQ ID NO: 4, SEQ ID NO: 5, SEQ ID NO: 6, SEQ ID NO: 7, SEQ ID NO: 8, SEQ ID NO: 9, SEQ ID NO: 10, SEQ ID NO: 12, SEQ ID NO: 13, SEQ ID NO: 14, or SEQ ID NO: 15.

44-75. (Cancelled)

76. (New) A method for producing a first protein having uridine phosphorylase activity and a second protein having purine nucleoside phosphorylase activity in the same cell, said method comprising culturing a host bacterial cell harboring a plasmid expression vector having the sequence as depicted in SEQ ID NO: 6 or a plasmid expression vector having the sequence as depicted in SEQ ID NO: 15, wherein the proteins are produced.

77. (New) The method of claim 76, further comprising the steps of isolating and purifying the proteins from the host bacterial cell.

78. (New) A method for producing a fusion protein having both uridine phosphorylase activity and purine nucleoside phosphorylase activity, said method comprising culturing a host bacterial cell harboring a plasmid expression vector having the sequence as depicted in SEQ ID NO: 9, wherein the protein is produced.

79. (New) The method of claim 78, further comprising the steps of isolating and purifying the protein from the host bacterial cell.

80. (New) A method for producing a fusion protein having both uridine phosphorylase activity and purine nucleoside phosphorylase activity, said method comprising culturing a host bacterial cell harboring a plasmid expression vector having the sequence as depicted in SEQ ID NO: 10, wherein the protein is produced.

{W:\02901\000J410000\00380206.DOC (2127536237.DOC) }

81. (New) The method of claim 80, further comprising the steps of isolating and purifying the fusion protein from the host bacterial cell.
